

C++ Development Engineer

Who is 7thSense?

7thSense Design Ltd is a privately owned creative software and technology solutions company with offices in Sussex, Detroit and Orlando. Established in 2004, we specialise in advanced Media Serving for markets such as Theme Parks, Planetaria, Live Events, 3D Entertainment Theatres and Visitor Attractions.

With our in-house developed Delta™ Media Server solution, we've sold over 3000 servers worldwide to a variety of prestigious facilities. These include a lot of the big-name Theme Parks, many famous Museums, Digital Planetariums, 3D Theatres, Airports, Live Events and more. We also have a big customer base in the Digital Signage and Live Events market.

About the Role | Who are we looking for?

Due to our increasing success and growth, we're growing our team of enthusiastic experts. We are recruiting for a C++ Development Engineer to join our development team.

- The successful candidate will work on the development of our core **Delta Media Server** and **Stack** software platforms to fulfil functionality requirements – taking a hands-on approach to product development.
- Become an expert in the use of the product and should have, or be able to rapidly develop, a deep technical understanding of the product, and of our industry.
- Provide support to our System and Support, Production, and Product Management teams to ensure the needs of the business are met.
- Provide technical support to customers in both the UK and abroad, to include system installation and integration and assisting Sales and Marketing teams with new business development projects and general market outreach.
- You will be a creative, proactive and forward-thinking person. You should quickly integrate into the team and develop ideas for projects that will enhance our product portfolio.
- Proposing improvements based on your own experience and customer feedback is a natural part of this role also and is something we encourage as a business.
- You should be comfortable working alone or as part of a small team, and there will be occasional travel involved to customer sites both in the UK and abroad. This may include improving or developing product features to meet customer needs, end-user training and sales and demo support.

Mandatory Technical Skills and Experience | The 'Must-Have's

Candidates must have some experience in the following areas:

- C++ Object Oriented Programming
- Microsoft Windows™ Software Application Development in Visual Studio
- A good understanding of maths and physics
- Excellent written, verbal and digital communication skills.
- Software version control systems – such as Subversion/GIT
- Computer Science, Electronic Engineering, or equivalent Degree Course
- Driving Licence
- Valid Passport

Additional Useful Technical Skills | The 'Helpful to Haves'

Any experience in the following areas would be helpful to the role:

- Sockets, Multi-threading
- Network administration and configuration
- GUI Design
- MFC and/or JUCE UI Library experience
- OpenGL
- Cross platform development
- Knowledge of Display systems
- Photoshop / video editing / 3DMax / Cinema4D / Blender
- Hardware interfacing / API usage
- Audio Visual systems and hardware
- Front & Back End Web (Java, NodeJS, PHP, HTML5, CSS)
- High performance PC hardware configuration and construction
